Our town has been the scepe of great excitement yesterday and to-day. Yesterday, the court was engaged all day in the examination of three negroes on a writ of labors corpus. They were charged with horse steeling, but were in reality fugitive slaves. This moraing Julya Corson decided that the stealing of a horse by a slave, for the purpose of escaping, was not a criminal offence, under the law for reclaiming fugitive slaves—and consequentming fugitive slaves-and consequentclaiming ingitive slaves—and consequent-ly he discharged them—they were then immediately out of prison, but they had no sooner reached the street than they were seized by their misters, and a battle en-sued between them—and after a severe struggle, two of them were hand-cuffed and one escaped—the court then issued a warrant against the masters and all others engaged for assault and battery, with intention to excite a riot—and the slaves and owners are now in jail. The courings, ordered the sheriff to employ a posse for the purpose of dispersing the riot at all hazards, which were assembled in front Montgomery, Elizabeth Montgomery, Hand and owners are now in juil. The court nlso, ordered the sheriff to employ a posse for the purpose of dispersing the riot at all hazards, which were assembled in front of the prison. The rioters were arrested and the military finally called out, and ten free negroes were arcested for trying to incite a riot. The two slaves are now in prison—but the owners and other persons engaged in securing the slaves were discharged, and are now before the court on trial of habeas corpus. The crowd in front of the juil has been dispersed by the front of the jail has been dispersed by the estate, situate in said Scioto county, to wit: militory, and at 2 o'clock P. M., as we Part of French Grant Lot No. 54, beginning now write, the town is resuming in a man- at a stone at the north-east corner of said ner a quiet order.

Old Dr. Jacob Townsend, THE ORIGINAL DISCOVERER OF THE
Genuine Townsend Sarsaparilla.
Old Dr. Townsend is now about 70 years of are, and has long been known as the AUTHOR and DISCOVERER of the GEN UINE ORIGINAL "TOWNSEND SARSAPARILLA." Being paor, he was compelled to limit its manufacture, by which means it has been kept out of market, and the male circumscribed to those only who had proved to worth, and known its value. It had reached the eart of many, newathelices, as those persons who had been healed of sore diseases, and saved from death, proclaimed its wonderful.

This GRAND AND UNEQUALLED PREPARATION:
manufactured on the largest scale, and is called for throughout the length and breadth of the land, especially as it is
found incapable of degeneration or descriptions.

Unlike young S. P. Townsend's, it improves with aga,
and never changes but for the better; because it is prepared
on scientific principles by a sensettife man. The highest
knowledge of Chemistry, and the latest discoveries of the
art, have all been brought into requisition in the manufacture of the Old Dr's Sarsaparilla. The Sarsaparilla rouit is well known to racdical men, contains many nedicinal
properties, and some properties which are inert or useless,
and others, which if retained in preparing it for use, produce fermentation and acid, which is injurious to the sysbem. Some of the properties o. Sarsaparilla are so volatile
that they entirely evaporate and are lest in the preparation
if they are not preserved by a scientific process, known onty to those experienced in its manufacture. Moreover,
these walatile principles, which ify off in vapor, or as an exbalation, under heat, are the very essential medical properries of the root, which give to it all its value.

Any person carn boil or sites it, "root till they get a dart

This is no prepared that all the inert properties of the Sarisaparilla root are first removed, everything capable of becoming acid or fermentation is extracted and rejected, then every particle of medical virtue is setured in a pure and concentrated form; and thus it is randered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most powerful agent in the Cure of faminuterable Discasses.

Hence the reason why we hear commendations on every side in its favor by men, women, and children. We find it doing wonders in the cure of CONSUMPTION, DYSPEPSIA, and LIVER-COMPLAINT, and in RHEUMATISM, SCROPULA, PILES, COSTIVENESS, all CUTANEOUS ERUPTIONS, PIMPLES, BLOTCHES and all affections arising from

S. P. TOWNSEND,
and ret he would fain have it understood that Old Dr. Jacob Townsend's Genturae Original Surseparitle, is an IMITATION of his inferior preparation?
Heapen forbid that we should deal in an article, which
would bear the most distant resemblance to S. P. Townseend's article and old Dr. Jacob Townsend's article and old Dr. Jacob Townsend's Samaparilla are Acapen-seide apart, and infinitely dissimular; that they are unlike in every particular, having not one single thing in common.

As S. P. Townsend is no doctor, and never was, is no themset, no pharmaceutist—knows no more of medicine or disease than any other common, unscisulific, unprofessional unit, what guarantee can the public here that they are receiving a genutine scientific medicine, castaining all the virtues of the articles used in preparing it, and which are trapable of changes which might render them the AGENTS of lisease instead of health?

But what size should be expected from one who knows onling comparatively of medicine or disease? It requires a person of some experience to cook and serve spreyers a common decent meal. How much more impuritant is if that the persons who manufacture medicine designed for WEAR STOMACHS AND ENFEEMELE DESTERNS.

WEAK STOMACHS AND ENFERRED SYSTEMS, should know well the medical properties of plants, the best sunner of securing and concentrating their healing virtues, also an extensive knowledge of the various diseases which affect the human system, and how to adapt remedies to hese diseases.

WASHINGTON HOUSE. Chesnut street above Seventh street. PHILADELPHIA,

PHILADELPHIA,

Is central, in the immediate vicinity of the most important public Institutions, the best and most fashionable places of business, and the attractive public Squares of the city. In the important requisites of light and ventilation, two principal objects aimed at in the recent enlargement and thorough improvement of this House, it is not exceeded, perhaps, by any establishment in America. To strangers, therefore, its position is peculiarly desirable. The subscriber returns thanks to his friends and the public for the liberal patronage they have extended to him, and assures them that he will endeavor to merit a continuance of their favors.
